PROFILE SUMMARY

Results-driven Computer Science Engineering student and professional Content Creator with a unique blend of technical expertise and digital storytelling. Proven track record of translating complex technical concepts into engaging multimedia content for diverse audiences. Skilled in software development and data analysis, complemented by a deep understanding of audience analytics, SEO, and brand strategy. Seeking to leverage cross-disciplinary skills to drive innovation at the intersection of technology and media.

EDUCATION

B.Tech – Computer Science Engineering

KIPM College of Engineering and Technology, 2023–2027 | CGPA: 5.578

Intermediate (12th) – 73% | High School (10th) – 70%

TECHNICAL SKILLS

Languages: C, Python, java

Core: Cyber Security, Operating system, Web Designing

Professional Experience

Plant Monitoring System | IoT Project

- Role: Lead Developer
- Tech Stack: Arduino / ESP8266, Soil Moisture Sensor, DHT11, Embedded C / IoT Basics
- Designed a real-time plant monitoring system to track soil moisture, temperature, and humidity.
- Enabled data-driven watering alerts to reduce manual plant maintenance.

PROJECTS

Smart plant monitoring system - Developed an automated Plant Monitoring System using IoT sensors to track real-time soil moisture and ambient conditions, ensuring optimal plant health through data-driven insights.

Wine quality prediction system - Engineered a Wine Quality Prediction system using Machine Learning algorithms to analyze physicochemical properties, achieving high accuracy in classifying wine quality through data-driven modeling.

TRAINING & CERTIFICATIONS

MERN Stack Training (5 Weeks).

POSITIONS OF RESPONSIBILITY

- **Cultural Head**– College Technical Society
- **Participant** – Projects in College

CAREER INTERESTS

Python | Java | Cyber Security | Core Computer Science

DECLARATION

I hereby declare that the above information is true to the best of my knowledge.
